

AP Biology Summer Assignment 2016

Obtain a copy of the book Your Inner Fish by Neil Shubin. It's available for \$10.62 on Amazon, \$10.56 on BarnesandNoble.com and is also available at the public library.

Assignment:

As you read the book, write (handwritten or typed) the following for each chapter. There are **eleven chapters** total:

[if !supportLists]• [endif]A summary of the main points of the chapter – this should be *at least 2* paragraphs in length, written in complete sentences and should be in your own words (not copied word for word in the book.)

[if !supportLists]• [endif]Any questions you have about this chapter

The book is 198 pages long, so if you pace yourself all summer long, you only need to read 20-25 pages a week.

This assignment is **due the first day of school** and will be your first graded assignment for the course. Late work will only receive 50% credit so do not forget it. If you'd like a text reminder two weeks and one day prior to the start of school, sign up for my remind 101 account by texting @gk6c4 to 81010
